

Please reject the NAB's petition 04-160. I have been a XM subscriber for about 4 months now and I absolutely love their service. I work about 100 miles from my home and the ability to listen to one radio station on my way to work is great. I travel at about 4am every day and traffic and weather reports are not available on FM at that hour. I travel to the DC Metro area. When I leave my home I like to listen to what is going on with traffic in the DC area so that if necessary I can re-route myself to avoid any problems. This service pays for itself for me. I pay for this service and it should not be up to the National Association of Broadcasters to dictate what i am permitted to hear. I urge you to respectfully reject this petition. Thank you.
